

A CITY OF WATER AND GENIUS

Vacanze
PAVESI

Pavia could never have been built elsewhere. Where the city rises today, the River Ticino flows towards its meeting with the River Po, providing precious lifeblood for the fields, a watery highway, and much more. Pavia is not just its historical centre: the banks of the Ticino and of the Naviglio Pavese, the canal that connects the city with Milan, can be your path to unforgettable experiences, in the midst of legends, great geniuses of history, traditions and Mother Nature..
